

“Just want to thank you guys for providing top level product, amazing prices, and for shipping the order out immediately. My finished product looks great, but all the credit goes to Tape Resources for providing everything I need to get the job done - quickly and professionally. I would never order from anywhere else. Thanks again!”

E. Mitchell

AMQ Series: The Ultimate Professional DV Tape for mission-critical use. Newly developed ABS shell, robust lubricant and extra thickness DLC film dramatically boost durability during still frame playback, repeated rewinding, fast forwarding and playback of professional editing. Offers particularly excellent characteristics compared with previous Panasonic tapes.

PQ Series: Manufactured to meet the demands for event videography and medium-critical production. Good editing durability, high-speed shuttling reliability, and higher signal output results in a robust image, while remaining affordable for institutional and professional use. Packed in frosted soft plastic album case.

Change to Sony's Consumer DV Tape Lineup:
Sony recently discontinued its EX (Excellence Grade) Series tape. An ideal, and lower cost replacement for the old EX is the Sony VG "Videographer Grade" HDV/DV. See above for pricing and more on the new Sony VG.

Using Professional DV for DVCAM
If you're reading this, you probably understand that DV and DVCAM tapes and VTRs are broadly compatible. For example, it is possible to record professional DVCAM signals onto consumer and professional DV tape. It is also possible to play back a consumer DV recording on a professional DVCAM VTR. If you are going to use DV in a DVCAM recorder, we recommend you use only professional DV media.

Using Professional DV tape in DVCAM Recorders
DVCAM machines use a transport speed faster than DV machines. So you'll experience differences between the marked and actual recording times. Here is what you can expect from using mini DV & DV tape in DVCAM recorders:

SMALL MINIDV	DVCAM	LARGE DV	DVCAM
33 min.....	22 min	96 min.....	64 min
63 min.....	41 min	124 min.....	96 min
83 min.....	55 min	186 min.....	124 min
		276 min.....	184 min
